Michael Perrine

Aspiring Data Scientist

San Antonio, Texas, United States

Summary

Currently I am an Investment Solutions Representative at Fidelity Investments. I've spent approximately 12 years in the financial planning industry. I am in the process of completing my masters degree in data science. My estimated completion date is end of November 2025. Afterwards I will pursue a career in data science.

My love for data began in the financial services industry where I learned the value of collecting data to build financial plans. That love grew when I began my masters program at Bellevue University where I learned how to harness large data sets to derive actionable intelligence and make business decisions.

Experience

Fidelity Investments

2 years 7 months
